Work Experience

12. 2018 – present: Full-Stack Software Engineer at CyberCraft Inc.

Projects:

CI/CD System(08.2018-11.2018)

Description:

System for Continuous Integration & Continuous Deployment :

- Developed the client side using React.js and GraphQL

Technologies: React/HTML/CSS/JIRA/Git/GraphQL

Solano CI(02.2018 – 06.2018)

Description:

Solano CI is a blazingly fast web and cloud based solution for Continuous Integration & Continuous Deployment. It dramatically reduces testing time — from hours to minutes and minutes to seconds — enabling engineers to focus on building and innovating! By harnessing Solano Labs' proprietary parallel optimization technology and fully-managed cloud infrastructure, engineers see results 10 to 50 times faster than before, saving time and money. With this product, developers can concentrate on creating software, not wrangling with test environment.

Responsibilities:

- Developed the client side using Vue.js

- Created and edited Rspec / Capybara tests
- Investigated and created a prototype to update the project
- Removing deprecated features

Technologies:

Ruby/Rails/HTML/CSS/JavaScript/Vue.js/Jira/Kubernetes/Rspec/Capybara/Git/AJAX

Cyber-dashboard(12.2018-02.2018)

Description:

Cyber-dashboard is a web app for workers review. Everyone knows about each. You know what learn to next review and what you failed in the previous review, also reviewer know about your previous skills and result from your previous review

Responsibilities:

- Developed the client side using Vue.js
- Developed the back side using Ruby on Rails
- Covered application Rspec/Capybara tests

Technologies: Ruby/Rails/HTML/CSS/JavaScript/Vue.js/Trello/Rspec/Capybara/Git/AJAX/JSON/MVC

04. 2018 – 11.2018 Pet-projects(net-shop, telegram-bot, students application)

My pet projects. I created a telegram-bot for exchange rate, created net-shop for understanding and learn CRUD and created e-journal for students **Responsibilities:**

- Developed the client side using Bootstrapp and Javascript
- Developed the back side using Python and Django

Technologies: Python/Django/HTML/CSS/JavaScript/Bootstrap/Git/AJAX/JSON/SQL
